

Mircowave Sensor

(mm)

Features

- Frequency Channel : 5.8GHz (+/-75MHz)
- Nominal operating voltage :10-18v DC
- Nominal discharge current :20mA
- Nominal mounting height :2-10m
- Nominal detection area : Max 10m (Diameter)
- Hold time : 3s/30s
- Stand by DIM level : ON/OFF or 100% / 30% light output

| | |
|-------------|--------|
| Finsh color | White |
| Height | 16mm |
| Width | 42mm |
| Length | 55.3mm |

Warning

- Suitable for dry and damp location
- Don't use for outdoor , raining or flowing may cause the sensor start work
- Don't use for vibration environment, vibration may cause the sensor start work
- Not sensitive to uniform motion object
- To avoid two sensors mutual interference, please keep at least 0.5m distance
